

Our Organisation

Olympic Dam Transport has a proud history of operating an environmentally conscious business in a fragile region of Australia.

Our vision is a sustainable operation in remote Australia. Our mission is to deliver service to our customers in an environmentally friendly and sustainable manner.

Our Commitment to Environmental Management

This policy covers ODT's operations at all sites throughout Australia.

ODT has made a strong commitment to environmental best practice and the prevention of pollution in general operations. Through a process of continual improvement we aim to achieve industry "best practice" in efficient and effective environmental office practices, providing a role model for others to follow.

Through a philosophy of 'rethink, reduce, reuse, repair, recycle' we will:

- At a minimum, conduct all of our operations, whether carried out by or on behalf of the ODT, in accordance with relevant legislation and government policy and agreements,
- Minimise waste-to-landfill and greenhouse gas emissions, further reduce our consumption of power, water and natural resources, maximise our positive environmental benefits, employ environmental considerations in purchasing decisions and continue to identify new areas for improved performance;
- Work closely with our employees, clients, suppliers and other interested parties to continually refine our work practices and operations;
- Actively promote and encourage the adoption of ecologically sustainable work practices and operations within our organisation
- Promote throughout the company a strong environmental ethic as part of its culture
- Consider favourably, suppliers who pursue good environmental management practices
- Providing our employees with the skills, awareness and leadership to achieve the ODT's environmental responsibilities.
- Make this policy available to the public on the ODT website
